IPL Photo rejuvenation

These facials are the ultimate in Natural (No surgery, No Botox, No fillers) facial rejuvenation using a broad wavelength light pulsed onto your skin. Sometimes our skin is so lifeless we need to stimulate collagen via light therapy to see any change. This can treat multiple skin conditions, broken capillaries, redness, freckles, age spots, collagen structure, eg. firmness. The benefits of these treatments are that there is no down time - ie. no hiding at home for days.

We combine this technology with the proven cellular nutrition of a deluxe Genetic facial. \$390
